

PRECISION

ACOUSTICS

IN-WALL / IN-CEILING SPEAKERS

The series offers the two most popular architectural loudspeakers sizes and applications to make sure that wherever there's a need for an in-wall speaker, there's an easy, inexpensive solution. Precision Acoustics In-Wall and In-Ceiling speakers have been designed so the average home owner can easily add music to any room in the house, all by themselves. Designed to be heard but not seen, they will bring you wonderful sound while blending into your décor. These 6.5" speakers are perfect on their own to bring music to a previously silent room or make the perfect rear channels for any Precision Acoustics surround system.

PA265IW
